Economic Impact Overview

All states offer tax incentives to promote activities, such as business development, that policy makers wish to encourage. One tool used by governments to help understand the impact of an incentivized activity is the economic impact model which estimates future state revenues against the cost of providing a tax benefit over time.

Economic models follow the flow of income that moves around an economy through the primary relationships between businesses and consumers. Models take into account the typical purchases made by companies to produce goods or services, where those companies are, and how workers spend the income that is made. The models follow these spending patterns within the economy to understand the larger impacts that circulate within a region and what income leaks out due to imports. While models are abstractions of the economy, reasonable estimates can assist policy makers in understanding the costs of tax incentives relative to the potential fiscal benefits, especially when analyzing an individual development project.

Economic impact models are particularly suited to analyzing business development tax credits, where the goal is increased economic activity over many years. With tax incentives that target non-economic objectives, the use of these models can still be informative but should be part of a larger decision-making process given the different policy goals.

REMI Missouri Economic Model

The Missouri Department of Economic Development (DED) uses the Regional Economic Models, Inc. (REMI) Policy Insight model to forecast economic impacts statewide. The REMI model estimates the long-term economic and fiscal impacts to the state of new firms and jobs for the primary purpose of determining benefit-cost ratios when tax credit incentives are used. Throughout the year DED uses the model for individual project analysis and on an annual basis for reporting purposes.

The state of Missouri has conducted analysis with the REMI model for over fifteen years and is one of many government entities throughout the country that use this system to evaluate economic impacts. Over 250 organizations, universities, and consulting firms use the model including governmental agencies in 40 states. In addition to DED, the Missouri Department of Transportation and Auditor's office also used REMI in the past to evaluate programs. Articles about the research findings have been published in professional journals, such as the American Economic Review, Economic Systems Research, Journal of Regional Science, Applied Economics, and the International Regional Science Review, and documentation of model equations are available on REMI's website.

In 2012 the Pew Center released a study, Evidence Counts: Evaluating State Tax Incentives for Jobs and Growth, which indicated Missouri was a top ten state in terms of the quality

of tax incentive evaluations. In 2013 a Pew Center and MacArthur Foundation Report, States' Use of Cost-Benefit Analysis, also listed Missouri as a top ten state applying cost-benefit analysis to policy-making. Missouri was also one of six states identified as using best practices for evaluating the economic impact of incentive programs in a 2013 Incentive Transparency Index developed by Investment Consulting Associates.

The REMI model is updated annually with federal data from the Bureau of Economic Analysis, Bureau of Labor Statistics, Census Bureau, and other agencies. DED also takes the extra step to annually calibrate the fiscal component of the model with Missouri Office of Administration budget figures to produce better state tax estimates. In addition to calibrating the fiscal component, a feature unique to REMI, the model also provides robust abilities to model impacts that are not found in most other impact models:

- The model can analyze economic impacts over a long period of time and take into account changes expected to occur. For example, REMI includes added cost to the state over time as a new economic activity attracts some workers from outside the state that will bring families and the need for governmental services.
- The model can account for local area competition when a new business arrives and competes with existing firms for market share. Restaurants and retail establishments, for example, may add new jobs but will compete with other firms and therefore could have a lower overall impact on the economy than the new jobs alone would suggest.

Economic Impact Example

The following project scenario provides an example of the fiscal impact a new manufacturing plant can have to Missouri given the assumptions listed below. Impacts are for a 10-year period and dollar figures are in present value terms.

Project Assumptions:

A new machinery manufacturing company locates in Missouri and creates 100 new jobs after one year of plant construction and equipment purchases which total \$12.5 million. The company then hires 100 full-time workers at average wages. The state offers \$2.0 million in tax incentives spread over six years. Over a ten year period the benefit-cost ratio is 2.39 indicating that for every \$1 dollar of tax incentive the state is expected to receive \$2.39 in net new general revenue.

PERFORMANCE MEASURE(S)

Comments on Performance Measure: The number of housing units produced is based on what is reported to MHDC by the non-profit sponsor of the development. Projects awarded AHAP credits may be awarded additional credits in succeeding years, however, these projects receiving AHAP credits are not counted as "new units". In this circumstance, MHDC places a new LURA on the units, extending the affordability period. In FY 2018, MHDC extended the affordability for 464 existing beds; 2 units.

The business must report to MDFB the number of new jobs; the total amount of salaries and wages paid to eligible employees and investment in capital improvements, semi-annually during the initial 3-year build out phase and annually for the term of the credits.

SPECIAL PROGRAM REQUIREMENTS

The following conditions must be met for a project to be approved.

- Sale of Bonds: Unless otherwise approved by the Board, the Applicant will be required to purchase the Bonds.
- Cooperative Effort: The political subdivisions benefiting from the project or other local entities must commit significant local incentives relative to their economic benefit compared to the state. Such incentives may include tax abatement, discounted utility fees or others, to the extent allowed by law.
- "But For" Test: DED and the MDFB must determine that the program is a material factor in the company's decision to initiate the project, and this is certified by the business.

Revised January 2012

- Positive State Economic Impact: The amount of new direct and indirect state taxes over an 8- to 15-year period, as calculated by DED, must exceed the total amount of incentives provided by the state.
- Requirements: New full-time (35+ hours per week) jobs in a new or expanding business (not including identical jobs filled by recalled workers, replacement jobs or jobs which previously existed in the business) are considered to be "new jobs". The business or a related taxpayer cannot have employed them during the preceding twelve months. The wages for such employees must be above the average wage for the area.
- "Clawbacks": In the event the business does not fulfill
 the commitments made regarding the number of new
 jobs or capital investment, the tax credits will be reduced
 proportionately. In the event the business relocates or
 reduces the operation below the minimum standards for
 new jobs or capital investment prior to the term of the
 bonds, the tax credits received prior to that time must be
 repaid in full.
- Bond Purchase: Since the MDFB cannot guarantee the bonds, the business will likely have to purchase the Bonds.

FUNDING LIMITS

The total state costs of the project tax credits must be less than the projected state economic impact of the project, as determined by DED.

The amount of remediation tax credits issued must be the least amount necessary to cause the project to occur.

APPLICATION/APPROVAL PROCEDURE

An applicant must submit an application to DED for determination of eligibility and request for remediation tax credits.

An application must also be submitted to the Department of Natural Resources (DNR) for participation in the "Voluntary Cleanup Program." Acceptance into this program is a requirement of the Brownfield Redevelopment Program.

Remediation that is performed prior to receipt of a written authorization for remediation tax credits from DED will not be eligible for tax credits and may jeopardize the project's overall eligibility for the program.

Applications may be submitted year-round. Each application is reviewed on a case-by-case basis.

REPORTING REQUIREMENTS

The "Tax Credit Accountability Act" reporting form must be submitted to DED by June 30 each year for three years following the year of the first issuance of tax credits.

SPECIAL PROGRAM REQUIREMENTS

Credits are subject to 2.5% issuance fee.

- The CDE submits an application to the Department of Economic Development (which is available on the website below).
- Once eligibility is determined, DED will send a
 preliminary approval letter to the applicant CDE, which
 will include an allocated amount of NMTC contingent

- 50% or more: 3% bonus of payroll of the new jobs.

Each time the business meets the minimum new job threshold, it may start a new benefit period for the net new jobs created. There is no limit on the number of benefit periods a company may use the program, as long as a new Notice of Intent is completed and minimum new job thresholds and other program qualifications are met.

"New jobs" are defined as full-time (average 35 or more hours/week each year) employees of the company that are employed at the project facility, based on the increase from the "base employment" (the number of full-time jobs at the facility, or the average number for the twelve-month period prior to the Notice of Intent, whichever is higher, on the date DED receives the Notice of Intent). In the event the company (or a related company) reduced jobs at another facility in Missouri with related operations, the new jobs at the project facility would be reduced accordingly.

FUNDING LIMITS

There is no annual cap on the retained withholding taxes. Tax credits issued for the entire program shall not exceed \$80,000,000 per calendar year, and are provided on a first-come basis.

Revised June 2018

APPLICATION/APPROVAL PROCEDURE

An application ("Notice of Intent") may be submitted to DED at any time of the year by the business. Applications may be obtained at www.missouridevelopment.org. DED's approval will:

- Confirm that the type of project/business is eligible.
- · Establish the date "base employment" is calculated.
- Reserve the estimated tax credits for the project.
- Establish the 2-year "deadline" date for the creation of the minimum new jobs to be eligible for the program.

REPORTING REQUIREMENTS

On an annual basis, the business must submit a report documenting the new jobs created, the total payroll, and confirming that the business meets the health insurance requirements for the new jobs. In the event that a company has not maintained the minimum program requirements, benefits will cease for the remainder of the benefit period. A high-impact project may continue as a small/expanding project as long as new jobs and other program requirements are met. SB1099, or the Tax Credit Accountability Act Reporting Form must be submitted to the Department of Economic Development by June 30th each year the company receives tax credits and for the three years following the end of the benefit period.

SPECIAL PROGRAM REQUIREMENTS

A business cannot earn benefits simultaneously at the project facility under this program if earning benefits under any of the following state programs:

- Missouri Enterprise Zone program or Enhanced Enterprise Zone program
- Business Facility program
- · Rebuilding Communities program
- · Brownfield Jobs and Investment tax credits

ELIGIBILITY CRITERIA

Program	Minimum New Jobs	Minimum New Private Capital Investment	Minimum Average Wage	Automatic Benefit
Zone Works (Note 1)	2	\$100,000	80% of County Avg. Wage	WH, 5 or 6 years (Note 3)

Mega Works 140	100	N/A	140% of County Avg. Wage	7% of new payroll, 5 or 6 years (Note 3)

"WH" means the retention of the state withholding tax of the new jobs

Note 1: Project facility must be located in an Enhanced Enterprise Zone.

Note 2: Project facility must be located in a "rural" county, which would NOT include

Boone, Buchanan, Clay, Greene, Jackson, St. Charles, and St. Louis City and County.

Note 3: Benefit period is 5 years, or 6 years for existing Missouri companies (those that have been operational in Missouri for at least 10 years).

In addition to the Automatic Benefit indicated above, the Statewide Works or Mega Works projects may be considered for discretionary benefits, limited to the net state fiscal benefit. The criteria for the discretionary benefits include:

- The least amount necessary to obtain the company's commitment;
- The overall size (number of jobs, payroll, new capital investment) and quality (average wages, growth potential of the company, multiplier effect of the industry) of the project;
- The financial stability and creditworthiness of the company;
- The level of economic distress of the project area;
- · The competitiveness of alternative locations; and
- The percent of local incentives committed to the project.

PROGRAM BENEFITS

Program benefits are (a) the retention of the state withholding tax of the new jobs and/or (b) state tax credits, which are refundable, transferable and/or saleable. The program benefits are based on a percentage of the payroll of the new jobs. The program benefits are not provided until the minimum new job threshold is met and the company meets the average wage and health insurance requirements.

"New jobs" are defined as full-time (average 35 or more hours/week each year and for whom the company offers/pays 50% of health insurance) employees of the company located at the project facility, based on the increase from the "base employment".

"Base Employment" is the greater of (a) the number of full-time employees on the date of the Notice of Intent, or (b) the average number of full-time employees for the 12 month period prior to the date of the Notice of Intent. In the event the company (or a related company) reduces jobs at another facility in Missouri with related operations, the new jobs at the project facility would be reduced accordingly.

FUNDING LIMITS

There is no annual limit on the retained withholding taxes. Tax credits issued for the entire program shall not exceed \$106 million for FY2014, \$111 million for FY2015, and \$116 million for 2016 forward.

ATTRIBUTES OF THE TAX CREDITS

The tax credits may be applied to Chapter 143 (state income tax, excluding withholding tax) and Chapter 148 (financial institution tax). Tax credits must be claimed within one year of the close of the taxable year for which they were issued. Tax credits can only be applied to tax liability for the year in which they were earned. Any annual unused balance is fully refundable. The credits may also be transferred, sold or assigned.

APPLICATION/APPROVAL PROCEDURE

Prior to the receipt of a DED proposal or approval of a notice of intent ("NOI"), none of the following can have occurred:

- Significant, project-specific site work at the project facility.
- Purchased machinery or equipment related to the project.
- Publicly announced its intention to make new capital investment at the project facility.

Upon receipt of the proposal/NOI, DED will:

- Confirm the business is eligible;
- Establish the date at which "base employment" is calculated;

Revised June 2018

- · Reserve the estimated tax credits for the project; and
- Establish the 2-year "deadline" date by which the minimum thresholds for the creation of the new jobs, investment, etc must be met.

REPORTING REQUIREMENTS

On an annual basis, the business must submit a report documenting the new jobs created, the total payroll, and confirming that the business meets the health insurance requirements for the new jobs. In the event that a company has not maintained the minimum program requirements, benefits may cease for the remainder of the benefit period. The Tax Credit Accountability Act Reporting Form must be submitted to the Department of Revenue by June 30th each year the company receives tax credits and for the three years following the issuance of the tax credits.

SPECIAL PROGRAM REQUIREMENTS

A business cannot simultaneously receive benefits for the same capital investment or the same jobs for the following programs:

- · Rebuilding Communities
- Development Tax Credit
- · Enhanced Enterprise Zone
- Quality Jobs
- Manufacturing Jobs

Special conditions apply when Missouri Works is used at the same time as other programs that affect state withholding taxes (Missouri Training, State TIF, MODESA).

The credits are provided each year for up to ten years after the project commences operations unless the life of the enterprise zone expires before that time.

ELIGIBLE AREAS

The eligible project must be located in one of Missouri's "enterprise zones." Enterprise zones are specified geographic areas as certified by the Department of Economic Development (DED) based on demographic eligibility and approval of a request by the local governments. The number of zones that may be certified is limited by law.

A list of certified enterprise zones can be obtained from the department or via its web site. To determine whether a particular location is in an enterprise zone, contact the local zone administrator for that zone.

ELIGIBLE APPLICANTS

Facility eligibility is determined by its primary Standard Industrial Classification (SIC) or North American Industrial Classification System (NAICS) code, and includes manufacturing. warehousing, wholesale distribution, mining, insurance carriers, research and development,

recycling operations, computer-related services and certain office activities.

To receive credits in any of the ten years, the facility must create at least 2 new jobs and make \$100,000 in new investment (\$1,000,000 for "replacement facilities") in that year as compared to the base year (the year prior to the commencement of operations at the facility).

The investment credits are based on the original cost of machinery, equipment, furniture, fixtures, land and building, and/or eight times the annual rental rate paid for the same. Inventory is not eligible.

ELIGIBLE USE OF TAX CREDITS

This tax credit can be applied to:

- ✓ Ch. 143 Income tax, excluding withholding tax
- ✓ Ch. 148 Insurance Premium Tax
- ✓ Sec. 375.916 Insurance Co. Retaliatory Tax

This credit has no special attributes and can only be applied to tax liability for the year it was earned, unless it was issued for a new facility, for which there may be up to a \$75,000 refund of state income taxes in the first two years of eligibility.

APPLICATION PROCEDURE

The business must submit a form letter of intent (pre-application) to the Department of Economic Development (DED) at least 15 days prior to the commencement of facility operations; otherwise, the project is ineligible for the tax credits. DED must determine eligibility of the business within 15 days of receipt of the text of intent form. Failure to meet this requirement precludes participation in the program for the base year sought.

The business past file an application for tax credits for its first year of operations by the end of the tax year immediately following the tax year during which operations were commenced. Failure timely file the application for credits for the first year of operations will result in a denial of the application and precludes participation in the program for the base year sought.

A company can receive:

- ✓ Up to a 50% state income tax exemption
- ✓ A \$400 credit for each new job
- ✓ A \$400 credit for each employee who is an enterprise zone resident

- Up to \$400 credit per employee trained who was a zone resident or "difficult to employ"
- A credit equal to \$5,500 for the first \$100,000 of new capital investment at the facility and 2% of new capital investment amounts above \$100,000 at the facility
